

PREC Dashboard / CMS UI & UX Requirements Document

Precious Real Estate Consulting (PREC)

Admin Dashboard & Content Management System (CMS)

Prepared for: Precious Real Estate Consulting (PREC)

Prepared by: Abstract Digital Solutions

1. Dashboard Overview

The PREC Dashboard is a simple content management and property administration system designed to help the PREC team manage website content, property listings, inquiries, and general company information without requiring technical expertise.

The system should prioritize:

- Simplicity
- Ease of navigation
- Accessibility
- Mobile responsiveness
- Quick content management
- Clear data organization

The dashboard will be accessible only to authorized PREC staff through a secure login system.

2. Dashboard Navigation Structure

Main Navigation Menu

- Dashboard Overview
- Property Listings
- Featured Properties
- Services Content
- Inquiries
- Announcements & News
- Contact Information
- Analytics

- Settings
-

3. Dashboard Home / Overview

Purpose

Provide a quick overview of website activity, inquiries, and property performance.

Key UI Elements

Summary Cards

- Total Properties
- Featured Properties
- Total Inquiries
- New Inquiries
- Published Announcements

Recent Activity Section

Displays:

- Recent inquiries
- Newly added properties
- Recently updated content

Quick Actions

Buttons for:

- Add Property
- Add Announcement
- Edit Services
- View Inquiries

Property Status Overview

Simple visual breakdown:

- Available
 - Sold
 - Rented
-

Data Handled

- Property counts
 - Inquiry counts
 - Property statuses
 - Recent updates
 - Announcement statistics
-

UX Notes

- Dashboard should load important information first
 - Cards should be visually clear and easy to scan
 - Quick action buttons should remain visible on desktop and mobile
-

4. Property Listings Management

Purpose

Allow the PREC team to manage all property listings displayed on the website.

Main Listings Page

Key UI Elements

Listings Table / Grid

Displays:

- Property image
- Property title
- Property type
- Location
- Price
- Status
- Featured badge
- Date added

Search Bar

Search by:

- Property name

- Location
- Property type

Filters

- Available
- Sold
- Rented
- Featured
- Residential
- Commercial

Action Buttons

- Add Property
 - Edit
 - Delete
 - Archive
 - Mark as Featured
-

Add / Edit Property Form

Property Information

- Property title
- Property description
- Property category
- Property type
- Price
- Location
- Property status

Property Details

- Bedrooms
- Bathrooms
- Land size
- Parking availability
- Additional features

Media Uploads

- Property images
- Gallery uploads

Inquiry Settings

- Enable inquiry form
 - Featured property toggle
-

Data Handled

- Property information
 - Property descriptions
 - Property pricing
 - Property images
 - Property status
 - Property features
 - Inquiry availability
-

Key Actions

- Add property
 - Edit listing
 - Delete listing
 - Archive listing
 - Mark as featured
 - Update availability status
-

UX Notes

- Image uploads should support drag-and-drop
 - Listing forms should be simple and sectioned clearly
 - Featured properties should display visible badges
 - Confirmation modal required before deletion
-

5. Featured Properties Management

Purpose

Manage which listings appear in featured sections across the website.

Key UI Elements

Featured Properties List

Displays:

- Property image
- Property title
- Location
- Status
- Featured order

Reorder Functionality

- Drag-and-drop arrangement

Quick Actions

- Remove from featured
 - Open listing
 - Edit listing
-

Data Handled

- Featured status
 - Display order
 - Featured visibility
-

UX Notes

- Limit featured properties to a manageable number
 - Drag-and-drop interactions should feel simple and responsive
-

6. Services Content Management

Purpose

Allow the PREC team to manage website service information and descriptions.

Services Covered

- Property Valuation
 - Property Management
 - Property Development
 - Property Sales & Letting
 - Title Deed Processing
-

Key UI Elements

Services List

Displays:

- Service title
- Last updated date
- Visibility status

Service Editor

Editable fields:

- Service title
- Short description
- Full description
- Key service points
- Banner image

Content Formatting Tools

Basic formatting only:

- Headings
 - Bold text
 - Lists
 - Paragraph spacing
-

Data Handled

- Service descriptions
 - Service highlights
 - Service images
 - Service visibility
-

Key Actions

- Edit content
 - Publish updates
 - Save drafts
-

UX Notes

- Keep editor clean and simple
 - Avoid overly complex formatting tools
 - Live preview section optional
-

7. Inquiry Management

Purpose

Provide a centralized inbox for all website inquiries and contact form submissions.

Inquiry Types

- General inquiries
 - Service inquiries
 - Property inquiries
 - Appointment requests
-

Main Inquiry Page

Key UI Elements

Inquiry Table

Displays:

- Inquiry ID
- Name
- Email
- Phone number
- Inquiry type
- Related property/service
- Submission date

Search Bar

Search by:

- Name
- Email
- Property
- Service

Filters

- Inquiry type
- New inquiries
- Recent inquiries

Inquiry Detail Panel

Displays:

- Full inquiry message
 - Contact details
 - Related property/service
 - Submission date
-

Data Handled

- Customer names
 - Email addresses
 - Phone numbers
 - Inquiry messages
 - Inquiry categories
 - Related property references
-

Key Actions

- View inquiry
 - Delete inquiry
 - Filter inquiries
 - Search inquiries
-

UX Notes

- New inquiries should be visually highlighted

- Inquiry details should open without leaving the page
 - Mobile layout should stack inquiry information clearly
-

8. Announcements & News Updates

Purpose

Allow PREC to publish updates, notices, and company announcements.

Key UI Elements

Announcements List

Displays:

- Announcement title
- Publish date
- Status
- Featured status

Add/Edit Announcement Form

Fields:

- Title
- Short summary
- Full content
- Cover image
- Publish status

Publishing Controls

- Draft
 - Publish
 - Archive
-

Data Handled

- Announcement titles
- Content
- Images
- Publish dates

- Visibility status
-

Key Actions

- Create announcement
 - Edit announcement
 - Publish content
 - Archive content
-

UX Notes

- Rich text editing should remain simple
 - Featured announcements should display clearly
-

9. Contact Information Management

Purpose

Manage company contact details displayed throughout the website.

Key UI Elements

Contact Information Form

Office Details

- Office name
- Physical address
- Postal address
- Working hours

Contact Details

- Phone numbers
- Email addresses
- WhatsApp number

Social Media Links

- Facebook
- WhatsApp

- YouTube
- TikTok

Embedded Map Settings

- Google Maps link
 - Office coordinates
-

Data Handled

- Office information
 - Contact numbers
 - Email addresses
 - Social links
 - Business hours
-

Key Actions

- Edit contact details
 - Update office information
 - Update social links
-

UX Notes

- Contact updates should reflect immediately on the website
 - Forms should support multiple office locations
-

10. Analytics Overview

Purpose

Provide a simplified overview of website engagement and inquiry activity.

Key UI Elements

Analytics Cards

- Total website visits
- Property views

- Inquiry submissions
- Most viewed properties

Performance Charts

- Weekly visits
- Monthly inquiries
- Property engagement

Top Performing Properties

Displays:

- Property image
 - Views
 - Inquiries received
-

Data Handled

- Website traffic
 - Inquiry statistics
 - Property engagement metrics
-

UX Notes

- Keep analytics visual and easy to understand
 - Avoid technical or overly advanced reporting
-

11. Settings & Basic Administration

Purpose

Provide access to general dashboard and website configuration settings.

Key UI Elements

General Settings

- Website name
- Website logo
- System email

- Time zone

Password Management

- Change password
- Secure login settings

Website Preferences

- Homepage featured property limits
 - Inquiry email destination
 - Default property status
-

Data Handled

- Website settings
 - Login credentials
 - Notification settings
 - Basic system preferences
-

Key Actions

- Update settings
 - Change password
 - Save configuration
-

UX Notes

- Sensitive actions should require confirmation
 - Settings sections should remain minimal and organized
-

12. Core UX & Interface Guidelines

General UI Direction

The dashboard should follow a clean and modern interface style that remains approachable for non-technical users.

UX Principles

Simplicity

- Minimal clutter
- Clear spacing
- Straightforward navigation

Accessibility

- Readable typography
- High contrast
- Mobile responsiveness

Consistency

- Reusable button styles
- Consistent form layouts
- Unified spacing system

Feedback & States

System should provide:

- Success messages
- Error messages
- Loading indicators
- Empty states

Recommended Dashboard Behavior

Empty States

Provide helpful guidance when:

- No properties exist
- No inquiries exist
- No announcements published

Confirmation Actions

Require confirmation for:

- Deleting listings
- Archiving content
- Removing featured properties

Responsive Design

Dashboard should function smoothly on:

- Desktop
 - Tablet
 - Mobile devices
-

13. Summary

The PREC Dashboard/CMS is intended to provide a simple and efficient internal management system for handling:

- Property listings
- Website content
- Customer inquiries
- Featured properties
- Company updates
- Website settings
- Basic analytics

The platform should prioritize ease of use, fast content updates, and accessibility while maintaining a professional and modern administrative experience for the PREC team.
